PROFILE

Full-stack developer based in Karachi. Builds live websites for real businesses while completing an Advanced Diploma in Software Engineering at Aptech. Comfortable taking a site from the page layout through to the server and the database.

Front-end work uses HTML, CSS, JavaScript, and Bootstrap. Back-end work uses PHP with MySQL, and ASP.NET MVC with SQL Server. Looking for an internship or a junior developer role.

TECHNICAL SKILLS

Front-end HTML, CSS, JavaScript, Bootstrap

Back-end PHP, ASP.NET MVC

Databases SQL Server, MySQL

MySQL is used on Kitchen Queen. SQL Server is used on James Thew Kitchen. Rab's Kitchen is a front-end site and does not use a database.

PROJECT EXPERIENCE

Rab's Kitchen Front-end

Tech HTML, CSS, JavaScript, PHP

rabskitchen.shaheerwe.com

Public website for a 100% halal homemade tiffin service in Calgary, Canada. Customers choose a weekly plan, book online, and collect from a downtown self-pickup point. This is front-end work and does not use a database.

- Built the public site for a tiffin service in Calgary, Canada, with weekly plans, online booking, and downtown self-pickup.
- Shipped the homepage, weekly menu, how it works, ingredients and hygiene, the chef's story, and reviews.
- Added the menu, WhatsApp confirmation, and a secure checkout step.

James Thew Kitchen Full-stack

Tech ASP.NET MVC, HTML, CSS, JavaScript, SQL Server

james-thew.tryasp.net

Full-stack site for authentic Pakistani cooking. Visitors read free recipes and tips, open a recipe, and register for a monthly or yearly membership. Accounts, recipes, and contests are stored in SQL Server.

- Built a recipe site with free recipes, tips, and membership plans.
- Added recipe list and detail pages, plus account registration for monthly and yearly members.
- Included a chef profile, how it works, and a contests section where people share recipes.

Kitchen Queen Full-stack

Tech HTML, CSS, JavaScript, PHP, MySQL

kitchenqueenoffical.com

Full-stack public site for a Karachi kitchen that delivers home-cooked desi food. The menu, deals, prices, and stock live in MySQL and are served with PHP.

- Built the public site with area selection and a daily menu.
- Covered deals, daal and sabzi, chicken, beef and mutton, haleem, rice, sides, drinks, and dessert, with prices and stock.
- Added a weekly menu page, family deals, and phone or WhatsApp ordering.
